Maher.srouji1@gmail.com · www.linkedin.com/in/mahersrouji - [Website](#)

Results-driven IT Specialist, Full Stack Developer, and Loan Processor with experience spanning software engineering, network administration, and mortgage operational workflows. Skilled in designing web applications, deploying web and domain configurations, managing IT infrastructure, and administering specialized financial industry systems. Proven capability to execute practical technical solutions while supporting operational pipelines and business workflows.

EXPERIENCE

JAN 2026 – JUNE 2026

IT Specialist

Texans Capital, Dekweneh | Boulevard Heights

- **Web & Domain Setup:** Bought domains, created websites, and hosted them using Namecheap; configured DNS settings to link domains with sites and business email accounts.
- **Email Administration:** Bought and managed Microsoft emails; configured and managed them to work properly with the purchased domains and sites.
- **User Support & Onboarding:** Provided technical support to all team members, from initial PC setup to troubleshooting and fixing technical issues, as well as onboarding newcomers.
- **Loan Operations:** Handled day-to-day loan processing tasks within LendingPad, prepared mortgage fee sheets, and processed regulatory NMLS filings.
- **Credit & Portal Management:** Ran soft and hard credit pulls for applicants and managed loan pipelines inside wholesale lender portals like UWM and Pennymac.
- **Communication:** Drafted and managed email communications with internal and external Account Executives to coordinate loan file requirements.
